Re: Letter of Reference for Mr. Jeremy Nef

To whom it may concern:

Mr. Jeremy Nef recently worked for FluidIQs as a subcontractor providing CAD drafting services. The duration of the subcontract was approximately seven weeks.

Jeremy was assigned to work under the direction of a project engineer in the preparation of nearly 900 detailed control panel and loop wiring diagrams for multiple water treatment plant automation projects.

During the period of his subcontract work we found Jeremy to be hardworking, dependable, and dedicated. He did a very good job of taking instruction, then efficiently executing the work. He also was not afraid to ask questions when he needed additional information, rather than going ahead on his own assumptions at the risk of making mistakes that would have required re-work.

It is our hope that this letter will assist Mr. Nef in future employment opportunities.

If you would like additional information, you can reach the undersigned at (801) 208-6969.

Sincerely,

A handwritten signature in blue ink that reads "Don Anderson".

Don Anderson
Project Engineer, FluidIQs
